BATES WINNER IN DUAL TRACK MEET

FIRST CONTEST OF SEASON LOST BY 57 1-2 TO 49 1-2.

INCLEMENT WEATHER HANDICAP

Only Three New Hampshire Men Take a First—Brill Wins the Track N. H. —No Records.

The first track meet of the season was held last Saturday with New Hampshire on the losing end. The score after the last gun was fired was 49 1-2 to 67 1-2.

The weather conditions were very unfavorable for a meet there being a cold raw wind all the afternoon.. One of the noticeable features of the meet was the condition of the Bates men.

Every Bates man, almost without exception, finished apparently none the worse for wear. This was due to the fact that up to date Bates has had six interclass track meets and one dual meet. New Hampshire has had no meet before this one and the men have had only 2 1-2 weeks training. However, compared with some of the other meets held on the same day, the times and distances made by the New Hampshire men were very good. Trinity and Worcester Tech. met last Saturday and very few of their marks were as good as New Hampshire's.

The way the men have been showing up this week in the intercompany meet indicates that many of them have missed their calling. For instance one man who has been doing fairly well in the pole vault is showing up fine in the high jump and fairly well in the shot-put. As the coach this season is a stranger to the college, he has no way of telling what each man is suited for, except to watch him as the season progresses.

THREE FIRST PLACES.

Only three men won first place for New Hampshire; Brill, '18 in the pole vault, Huse, '18 in the hammer throw, and Fettee, '16 in the high jump. Fettee also got third in the low hurdles which made him tied with two others for the heaviest point getters, each having six points to his credit. Brill and Huse were next with five points apiece. Brill was the only man to make his letters for the first time.

THE SUMMARY.

100 yd. dash—won by Small, Bates; 2nd Ward, N. H.; 3rd Ross, N. H. Time 10 3-5 sec.

880 yd. run—won by Mansfield, Bates; 2nd Wentworth, N. H.; 3rd Clark, N. H.; Time 2 min 10 2-5 sec.

High jump—won by Pettee, N. H.; 2nd Rollins, N. H.; Stevens of N. H. and Stinson of Bates tied for 3rd place. Height 5 feet 4 1-2 inches.

120 yd. Hurdle—won by Quimby, Bates; 2nd Boyd Bates; 3rd Hewey, N. H. Time 18 1-5 sec.

16 pound Shot Put—won by DeWeaver, Bates; 2nd Bugbee, N. H.; 3rd Wadleigh, N. H. Distance 36 feet.

220 yd. Dash—won by Small, Bates; 2nd Ward, N. H.; 3rd Ross, N. H. Time 23 1-5 sec.

Pole Vault—won by Brill, N. H.; 2nd Drew, Bates; 3rd Hurd, N. H. Height 10 feet 1 inch.

One Mile Run—won by Lane, Bates; 2nd Doe, Bates; 3rd Whittemore, N. H. Time 4 min. 51 2-5 sec.

Broad Jump—won by Keaney, Bates; 2nd Degnan, N. H.; 3rd C. W. Davis, N. H. Distance 21.5 feet.

440 yd. Run—won by Conners, Bates 2nd Lawrence, Bates; 3rd Mansfield, Bztes. Time 55 1-5 sec.

220 yd. Hurdles—won by Quimby, Bates; 2nd Hewey, N. H.; 3rd Pettee, N. H. Time 27 4-5 sec.

16 pound Hammer Throw—won by Huse, N. H.; 2nd Bugbee, N. H.; 3rd Quimby, Bates. Distance 108 feet 5 1-2 inches.

Two Mile Run—won by Lane, Bates; 2nd Doe, Bates; 3rd Paulsen, N. H. Time 14 min. 2 sec.

High class motion pictures and vaudeville at Lyric.

TWO YEAR 1915 CLASS GRADUATION EXERCISES

Professor J. W. Sanborn to Make Address—Sixteen to Receive Certificates—Reception Follows at President's

The graduation exercises of the 1915 two-year class will take place Wednesday afternoon, May 19, at 2.30 in Thompson Hall. The regular activities of the college will be suspended for the afternoon that all may attend who wish. Sixteen will receive their certificates.

Professor J. W. Sanborn of Gilman-ton will deliver an address to the class upon the subject: "Your Obligations And Opportunities."

A paper will be presented by George A. Runnals, and the class history read by G. W. Hazen. The college orchestra will be in attendance.

At 4.00 a reception to the graduates and their friends will be held at President Fairchild's home.

LIEUTENANT AND MRS. SUTHERLAND ENTERTAIN MAY PARTY.

Lieutenant and Mrs. Sutherland entertained a dozen of her friends Saturday evening, May 1, at an informal musical. Music was enjoyed the first part of the evening and May baskets of flowers presented to the women. Refreshments were served, followed by a social hour, after which the party broke up. Those present were; Misses Marion Chase, Martha Hoitt, Caroline Hoitt, Goldie Basch, Julia Roberts, and Messrs Charles Fettee, John Thompson, Bernard Dwight, Charles Weigel, Fred Manter, Donald Libby, Vance Batchelor.

PI ALPHA PHI SORORITY HOLD ENJOYABLE MAY DANCE.

Pi Alpha Phi Sorority held a most enjoyable dance in Grange Hall, Friday evening, April 30. Mr. and Mrs. Laton and Mrs. Byron were the patron and patronesses. The hall was transformed into a Spring garden of apple blossoms and wistaria, with a maypole in the center. Boxes of candy were the feature of the favor dance; refreshments were harlequin ice cream, wafers, and punch. Ward, Langley and Ross furnished music.

The guests were Messrs. Young, Cram, Hobbs, Reed, Fernald, Parnell, Robinson, Watson, Meserve, Fogg, Chase, Hurd and Morgan.

ELECTION OF OFFICERS HELD BY NEW HAMPSHIRE BOARD.

At the last meeting of the New Hampshire board election of officers for the coming year was held. W. E. Howard, Jr., '16, of Belmont, N. H., was elected managing editor and V. H. Smith, '16 of Hudson, N. H., business manager.

The vacancy in the position of assistant news editor was filled by the election of E. F. Cutts, '17, of Manchester, while the position of editorial writer is to be held by E. L. Blake '16 of Durham. S. W. Dyer, '16, of Lawrence, Mass., was elected alumni editor.

SPRUCE AND PINE PLANTINGS BY FORESTRY DEPARTMENT.

The Forestry Department has planted three acres to Scotch pine in Davis Park, Lee, which was given to the college several years ago. Plantings of Norway pine, Scotch pine and Norway spruce have also been made in the old pasture adjoining the one bordering the south end of the college woods.

MANY APPLICATIONS FOR PHYSICAL DIRECTOR POSITION.

The faculty athletic committee has been receiving many applications for the position of physical director, and general coach. An effort is being made to secure a man who is primarily an expert in football, who is skilled in gymnasium work and is competent to coach basket ball, track and baseball.

TEXT OF TALK BY GOVERNOR SPAULDING

GIVEN AT THE ALUMNI BANQUET IN BOSTON, APRIL 10.

STATE NEEDS N. H. GRADUATES

Says Legislators and People of State Appreciate Work College is Doing—Friendly Attitude Bound to Grow.

The full text of the speech made by Governor Spaulding of New Hampshire at the Alumni Banquet held in Boston, April 10, has been secured and is printed below.

Mr. President and Other Alumni of the New Hampshire College:

How pleasant is Saturday night when we've worked all the week for the state—and then been rewarded with a holiday evening as enjoyable as this one.

I am very glad to be able to be here tonight, in acceptance of your kind invitation, and to tell you that the people of New Hampshire are proud of their State College; that the Governor of the State is proud to be an ex officio member of your board of trustees.

I bring to you tonight a brief message of congratulation, appreciation, and, I hope, inspiration.

I congratulate you on the splendid condition at present. and the bright prospects for the future, of your College at Durham.

Credit Due President Fairchild.

You have there, in Doctor Fairchild, one of the most able, devoted, hard-working and successful college presidents in this country.

I see that you know him as well as I do, and that your opinion of him is the same as mine.

He can tell you much better than I can of the situation at Durham; of the strong faculty, the excellent equipment, the bright, growing, enthusiastic student body; and the fine work the boys and girls are doing in securing a useful and practical, and at the same time, a well-rounded education.

He can tell you, also, of the excellent beginning that has been made in extension work; in taking to the farms, to the shops, and to the homes of the state, the benefits of the work done, the experiments made, the facts learned, at Durham.

I congratulate you, New Hampshire College graduates, because, to the honorable past history of your institution, there is being added, every day, an enviable record of growth and achievement.

I would like to send to the undergraduates of New Hampshire College a message of congratulation upon the splendid opportunity which the state has given them at Durham; an opportunity of which, I am sure, they are making the most.

And, finally, I congratulate myself, as representing the state, upon the excellence of this institution; which bears the state's name and does the state's service in the advanced technical education of its youth.

PROOF OF REGARD.

These words of congratulation have been, largely, words of appreciation, also; but I can add to them a concrete expression of the regard in which the New Hampshire College is held by reporting to you the special appropriation of \$172,000. by the present legislature of our state, for the benefit of the institution, and to accommodate, in part, its growth.

This is far from meeting all the needs of the college; and I wish that a much larger sum might have been appropriated in order that wise and sufficient provision could be made, not only for the demands of today, but for those of tomorrow as well. This is, however, a time of necessary retrenchment and close calculation in our state finances; and it is a source of gratification to me that our legislators were able to deal

INTERSCHOLASTIC PRIZE READING

THE ANNUAL CONTEST TAKES PLACE TONIGHT IN THOMPSON HALL.

OVER 30 ENTERED BY SCHOOLS

Eleven More Entries Than Last Year—Judges Announced—Prizes of Five and Ten Dollars Each.

The annual interscholastic prize reading contest will take place this evening in Thompson Hall at 8 P. M. Four prizes have been offered by the New Hampshire College Alumni association; two of ten and five dollars each for the boys, and two prizes of ten and five dollars each for the girls. The judges this year will be as follows: Mrs. Ralph D. Laine of Durham; Professor Clyde Swan of Amesbury, Mass., and Mr. Alfred E. Richards of Hartford, Conn. This year there is an increase of eleven contestants over the number of competitors last year.

CONTESTANTS.

The names of the contestants and the schools they represent are as follows:

Arlington High, Anna Hooker, William Severance; Brewster Free Academy, Ruth Madeline Barnes, James Percy Gibbs, Charles Ivan McCall, Clara Frances Whitner; Dover High, Edward D. Sullivan; Dummer Academy, Edward S. Dodge; Manchester High, John L. Sullivan; Newburyport High, Mary Cashman, Roy Chase, Carolyn Glen, Helen Nolan, Samuel Stratton, Anthony Towle; Pembroke Academy, Walter Fremont Cheney, Leonora M. Cofran, Julietta Hart Farnum, Ruth Barnwell McFadden; Pittsfield High, Pauline Hall, Carroll Hill, Olive Potter, Waldo Potter, Rena Sanborn; Rochester High, Wallace Wright; Sanborn Seminary, Arthur Butler Brown, Elinor Bryant Flower, Mary Elizabeth McCartney, Doris Lenora Nye, Elbridge Lester Shaw, Ruth Stevens; Warner High school, Herman Foerster.

Music will be furnished thru the courtesy of the New Hampshire College Orchestra, and the ushers will be young ladies of the college.

PARTIAL LIST ANNOUNCED OF SUBJECTS OF SENIOR THESES.

A partial list of the thesis subjects of the seniors has been obtained and is as follows:

R. E. Haines, "A Complete Preparatory School Course in Manual Training."

C. W. Davis "The Reduction of Lead Sulphate in Aqueous Solutions."

F. D. Bronson, "Present Condition of White Pine Lands Five Cr More Years After Cutting."

L. F. Brown, "A Comparison of Cost of Producing Milk From Cows Calving In The Fall, And In The Spring."

B. G. Cdiorne, "The Methods of International Arbitral Proceedue."

J. S. Filiott, "The Relation of Dairying To The Florists' Business."

J. F. Thompson, "History Of The Development of the Electric Furnace With The Construction Of A Furnace At the Laboratory."

THE NEW HAMPSHIRE AND THE ALUMNI ASSOCIATION CO-OPERATE.

At the last meeting of the New Hampshire Board, upon recommendation of Professor C. F. Hewitt, it was voted to make an arrangement with the New Hampshire College Alumni association so that it would be possible for an alumnus to get "The New Hampshire," for one year including the alumni dues for \$1.50 per year, seventy-five cents, going to the Alumni Association and seventy-five cents to "The New Hampshire." This proposition will be presented at the annual meeting of the Alumni Association which will be held commencement week. It is thought that this arrangement will be most acceptable to the members of the alumni.

TENNIS TOURNAMENT IN FULL PROGRESS

Three Matches Played Daily—Over Thirty Entries—Summary of First Two Day's Play.

The tennis tournament conducted under the auspices of the newly organized tennis association is well under way, with twenty-four entries in the singles and eight in the doubles. Three matches are being played each afternoon, and it is expected that in a few days now a fourth court will be available thus making it possible to run four matches daily. It is the plan of the committee in charge to finish the play in singles before beginning the doubles. With favorable weather conditions the play in doubles should start at the latest, Monday, May 17, and be finished during the same week. This will allow the team which will go to Connecticut at least a week's practice.

Much enthusiasm and interest is being shown in the tournament not only by the contestants themselves but by the college as a whole.

THE SUMMARY:

The summary of the matches up to the time of going to press is as follows:

Monday, May 3.

R. L. Nelson won from E. L. Sanborn, 6-3; 18-16.

W. J. Nelson won from E. N. Sanders, 6-4; 6-0.

Tuesday, May 4.

R. H. Sawyer won from C. H. Coborn, 6-4; 6-3.

P. B. Badger won from J. A. Sussman, 6-1; 6-2.

E. C. Fisher won from J. F. Thompson, 6-3; 6-4.

SECOND PARTY OF YEAR HELD AT BALLARD HALL.

Ballard Hall was the scene of a most successful dance on Saturday evening. The dance hall was charmingly decorated with wistaria and apple blossoms and the matrons, Mrs. Fairchild, Mrs. DeMeritt, and Miss Stanley were seated in an arbor of wistaria. Mr. Ward furnished the music, and at intermission maple walnut ice cream, wafers and grape nectar were served. The guests were Messrs Buffum, Sherrer, Paulson, Degnan, Bugbee, Temple, Colomy, Hadley, Blatchford, Hurd, Cutts, Langley, Bartlett, Grant, Hall, Lane, Learmonth, Bennett and Russell.

ALICE J. HOITT '15 ENGAGED TO RUSSELL W. GARLAND '14.

Mr. and Mrs. George G. Hoitt announced the engagement of their daughter, Alice Joanna, of the class of 1915, to Russell White Garland '14, at an informal dinner party, Monday evening, May 3. The guests were Misses Plumer, Murphy, Hopkins, Waldron, Nash and Marston of Durham, Miss Helen Hayes of Dover and Miss Mabel Perkins of Jacksonville, Florida.

APRIL WEATHER PROVES TO BE GENUINE RECORD BREAKER.

April has not lagged very far behind its immediate predecessors in iving us interesting weather conditions. The most noticeable feature in the monthly report on the temperature on April 26, which reached a maximum of 84 degrees, thus breaking all previous records on that day of the year. The sultry condition of the atmosphere and the business-like way in which the thermometer began to climb the next morning promised another record-breaking day, but with a change in the direction of the wind the temperature dropped 24 degrees in less than that number of minutes.

While the rainfall was only 1 inch below the normal, it came in such small amounts that a large percent evaporated before reaching the plant roots. The exceptionally dry condition of the ground, due to the absence of soaking spring rains was relieved only by the storm on the 30th.

NOTICE.

On account of the time elapsed since the last issue of the New Hampshire, it was considered advisable to enlarge the present issue to six pages.

All those who desire to try out for the position of Society Editor on The New Hampshire for next year, should hand in their name to the News Editor at once.

NOTICE.

Those who have not paid their subscription to "The New Hampshire" are urged to do so at once. In order to close the year with all bills paid, including the old debt, it will be necessary to have all subscriptions paid. Please see the business manager at an early date.

NOTICE TO ALUMNI.

Do you enjoy the alumni column? If so, will you send in an item in regard to yourself for the next issue of "The New Hampshire." Address same to the alumni editor. In order to have an alumni column filled each week, it will be necessary for every alumnus to send in items of news weekly.

EDITORIALS.

More Watered Gasoline.

ADVERTISING.

One of the best means we have of advertising our college is thru deputation trips. The sending of New Hampshire men to the more distant parts of the state brings us into contact with many young people who may be attracted to Durham. On with the good work!

TRAINING.

There has never been a time in the history of New Hampshire College when a training system has been successful. The conditions made success practically impossible. Success might have been possible however if every man had been responsible and faithful. Training is absolutely essential if men are to do their best work. This does not mean a special place to eat and a special brand of food, necessarily. But it does mean in our case, that men out for teams should get a proper amount of sleep and wholesome food. They should not smoke or drink. They should not go to Dover nights, especially nights just before a game or a meet. They should regulate themselves and control themselves and train—themselves.

THAT INFORMAL INFORMAL.

No one, who did not see it, would imagine how much nicer the last in-

formal appeared than the previous ones. To see the men asking the girls themselves for dances was a treat. It made the thing appear like a gathering of ladies and gentlemen rather than a bunch of jockeys swapping horses. There is just one other reform needed and that is the removal of that receiving line. We want the chaperons, but we want them looking at things with us rather than looking at things through us.

SINGERS WANTED.

To make the opera Iolanthe a success; to make the hit that it ought to be; to uphold our reputation and to please the people who will hear the opera;—those are the present aims of the Glee Club. And to do those things there should be a chorus of at least twenty-five girls and forty men. The material is here and it should make itself available. There is a good time, some valuable experience, some honor, some genuine pleasure and some work in it for those who will come out. Come out, everybody who can sing at all, and see how it feels to hear an opera from the farther side of the footlights.

CHEERING VERSUS KIDDING.

We pay a quarter, a half dollar or one dollar for a ticket to an ordinary baseball game. This ticket entitles us to see two teams play a game of baseball, thereby earning for the individual members of those teams or for their organizations certain remunerations. Incidentally the ticket gives us the privilege, fancied or otherwise, of roasting, kidding or vituperating the players of either side, the umpire, the scorer, the managers or the people who sit next us; and we use or abuse this privilege to the limit.

The possession of our Athletic Association tickets entitles us to go to the games in which the college team plays and root for our team. Rooting for our team does not include a continuous display of wit directed at the opposing team or at one or two players on the opposing team, nor does it include a senseless railing at the umpire. It is supposed that the effect of a continuous and enthusiastic rooting is to incite men to surpass themselves in moments of stress in athletic contests, and that is the basic idea of the cheering which has become so much a part of college athletics. The insistent demand by a body of strong-lunged men for the team to do something stirs the blood and nerves of the team members to great things.

But we do not stir up our ball players to make hits by trying to get the opposing third baseman's goat or by kidding each man as he comes to the plate. We are not thus helping our team but we are helping defeat it. If you want our team to win, spend your efforts in encouraging it. Save the acid in your system to be poured out on teams whose members are paid to disregard the poor sportsmanship of spectators.

OUR CUT SYSTEM.

About once every two years a new cut system is put in operation here. Some succeeded fairly well and others not so well, but none of them have lasted a very long time. Now these systems have all been replicas of systems which have worked well in other places, and the fact that they have not worked well here shows on the face of it that there is something wrong.

The trouble must be located and the blame placed somewhere. In this case it seems as if we must lay the fault at our own doorstep rather than with the faculty. We are fond of blaming the faculty for all our misfortunes, and perhaps we are right; but we will have to be granted that the faculty has done it's part nobly toward observing the spirit of the rules of the present system.

We have not done so well because, as we all know, our cuts are not always necessary. Particularly does it seem that the wholesale using up of cuts just before or after a vacation is not only unfied but also foolish and useless. In a very few cases it is necessary to stay over a day or to go home a day early. In the majority of cases, however, the idea is simply to get a few extra days vacation.

No matter how long a vacation is somebody always stretches it a little. The result, when a hundred or a hundred and fifty-somebodies do the same thing, is demoralizing in the extreme as can easily be seen by looking at the class work at the end of a vacation.

The present cut system is the best one we have ever had. Do we wish to

keep it or do we wish to compel the installation of a system of fines. This is the crucial time to decide. If we do wish to keep a system which is liberal and fair and easy then let us be square with it. If we do not, then all we have to do is what we are now doing.

W. E. CHAMBERLAIN MAKES
A REPLY TO "A. A. WADSWORTH."

In your recent criticism of my talk on the subject "Through a glass darkly" you are evidently a believer in "Hitching your wagon to a star" which is all well and good. However, you should not lose your way among the clouds, the ultimate result of which can only be a quick and sudden return to earth.

Regardless of what ought to be, let us consider things as they actually are. It has always seemed to me that the Y. M. C. A. should be the most representative body of any group in college, and that as such with the watchword of "Service" it should be ready to fill in any niches in college life which may need attention, as for example, publicity work, newspaper write-ups of games and the like. Owing to the fact that in the past we have had no physical director there has been an excellent opportunity for the formation of "physical improvement" classes; also owing to the fact that New Hampshire College has no outing club there has existed a splendid chance for the Y. M. C. A. to organize various walking trips. These are things which come in touch with the entire student body and cause them to have confidence in the Y. M. C. A. From the attendance at the meetings and the condition of the treasury it is very evident that this confidence or interest is lacking here in New Hampshire College.

If the above be true there must be a reason and one hears various explanations which seem to fall down under analysis.

"Men in Y. M. C. A. work are not men of high caliber," "Not the right men at the head of the work," "Men not sincere in their work," "Y. M. C. A. run by certain fraternity," while all this may have been true several years ago I do not believe they will hold today. Hence there must be some deeper reasons why the Y. M. C. A. does not receive the popular support. Every man in college will admit that the organization is a good thing. However, it is also a notorious fact that college Y. M. C. A. work as a whole and the Y. M. C. A. Sunday service fails to interest the student so that he neither supports them with his presence nor his pocket-book.

The real reason I believe to be purely psychological. Let us consider the student body of New Hampshire College. For the most part it is made up of men from farms and the small towns of the state. In such localities it is often the custom for the entire family to attend service on Sunday, so that from early childhood the Freshman goes to church. In early childhood he can in no way understand what the sermon is about and yet the child must sit through it, perfectly quiet for a period varying from an hour to an hour and half. This is scarcely a normal thing for a healthy child to do. Meanwhile impressions are being formed in the child's mind which tends to a dislike to going through the same uncomfortable performance on the next Sunday, ad infinitum.

We know that the country has long been a "stamping ground" for young ministers to "try out" in, and old ministers to die in, and the country has suffered accordingly. There were formerly no ministers trained for real country work, and as a consequence those who remained in the country were men who were woefully inefficient. Many of these were of the same type as the man who had the vision and saw the letters "P. C." in the heavens. He at once concluded the significance to be "Preach Christ," when the work for which he was really fitted was "Picking Chickens."

Until quite recently, the church has failed to recognize religion as a science. Another factor tending toward inefficiency in the ministry and having its indirect effect on the country boy is the starvation wage. The average salary of all the ministers in the United States is \$663.00. It is safe to assume that there are more receiving under \$600.00 than over that amount. The result is that every year we are having an increasing number of empty churches in the country. All of which exerts an influence, for when the country boy becomes the youth he still goes to church with the entire family, but the sermons he hears in the church from the

NEW HAMPSHIRE WINS
3 GAMES, LOSES 4

Norwich Humbled 12 to 1—Connecticut Only Team Beaten in Spring Trip—Massachusetts Game Close.

In a game that proved more of a battling fest than anything else New Hampshire handed a 12 to 1 defeat to Norwich University, Thursday, April 29. New Hampshire was in tip-top form and the result was merely a little practice in batting and running bases.

Bissell pitched for New Hampshire and had the visitors at his mercy at all times. Bishop starred at the bat for Norwich, securing three of the five hits and knocking in their only run. Every New Hampshire man secured at least one hit and Fernald three. Bingles by Bissell and Hazen brought in runs. The visitors were saved from a shut-out by a run which came in the fifth from an error, a base on balls and a hit. The game was called at the end of the seventh to allow the visitors to catch a train.

MAINE GAME.

April 16, the first home game of the season was played with the University of Maine as the opponent. The score was very close throughout the game. Humiston pitched good ball but the heavy hitting Maine team was too much. The visitors were able to bunch their hits when needed.

BROWN GAME.

New Hampshire was defeated by Brown on Andrew's Field, Wednesday, April 21, by the score of 6 to 2. Brown won in the fourth, when three hits, an error, two bases on balls, and a fielder's choice netted five runs. New Hampshire's two runs came in the seventh. Irvine singled and Welch followed with a three bagger, scoring Irvine. Welch scored on an error by Burbee. In the second inning Murray was spiked by his

teammate Johnston and was carried off the field.

Struck out by Bissell, 5; by Cram, 7 in 6 innings, by Crowell 2 in 3 innings. Left on bases, N. H., 4, Brown, 7. Double plays, R. Cram to Andrews; Irvine (unassisted.) Hit by pitcher, by Bissell, Murray; by Cram, Blatchford. Time 1 hr., 30 min.

TRINITY GAME.

New Hampshire put up a disgusting exhibition of base ball in Hartford, Thursday and was defeated 9 to 0. The cold and wind made the team slow. Paulsen was hit hard. Gillooley of Trinity starred.

MASSACHUSETTS GAME.

New Hampshire lost another game Friday, April 23, Massachusetts Aggies turning the trick this time. Humiston was in the box for New Hampshire, and pitched a good game. "Ted" Cram led at the bat with a double and a triple. The score was kept down by a pretty double play by Brackett, Blatchford and Cram in the sixth inning.

First base on balls, off Humiston, 3; off like, 2. Hit by pitcher, C. Fernald. Left on bases, Massachusetts, 8; N. H., 7. Stolen bases, Johnson. Double play, Brackett, Blatchford, Cram.

CONNECTICUT GAME.

The last game of the trip was marked by a turning point in New Hampshire's luck. Bissell had great control, allowing only three hits off his delivery, and shutting out the home team 8 to 0. "Ted" Cram easily led at the bat, securing four singles in five trips to the plate. Both Brackett and Bissell made timely hits. Welsh played a fast fielding game and ran bases like a big leaguer.

PRACTICE GAME.

April 27 New Hampshire played a practice game with the Salmon Falls Manufacturing Company's team and won 6 to 2. The feature of the game was playing of Vreeland, who struck out six men in six innings and brought in the only two runs his side secured. The game was called in the eighth to allow the visitors to catch the train.

PROFESSOR GROVES NOT TO ACCEPT OFFER FROM M. A. C.

Prof. E. R. Groves has withdrawn from being considered for the position of head of the department of rural sociology at the Massachusetts Agricultural College. This position for which Professor Groves was asked to become a candidate by President Butterfield, offers at present, one of the largest opportunities in the field of rural sociology. The position is to be filled by the trustees at their May meeting. Professor Groves has refused to allow his name to be presented because of his unwillingness to leave Durham at this time.

WORK PROGRESSES RAPIDLY ON BENCH LATHES.

Everything Except Castings Done by the Students—Foundry Expected to be Installed for Use Next Fall.

A few weeks ago the junior manual training students commenced sketching and dimensioning the slide rest and bed of the 8 inch Ames bench lathe in use in the machine shop. This work has been completed and the tail stock will now be dimensioned preparatory to having complete drawings and blue prints made. Already this has been done with the bed and one other principle casting so that the students in the pattern shop are working on the patterns for these parts.

CASTING DONE IN DOVER.

All of the iron castings to date, have been made by a company in Dover. As this is special work, the cost is especially high, besides the students should have this much needed practise and knowledge concerning the art of casting iron. At the present time, the mechanical engineering department is unable to cast iron in its shops because of lack of facilities. This will undoubtedly be remedied during the summer so that New Hampshire College will have as good a foundry as any school in the state. This will enable the department to perform all of the operations in the manufacture of the six bench lathes including necessary heat treatment. By completing the missing link, namely, the foundry, practical work may be done and, better yet, the work will be much better correlated than at present.

GREATER FACILITIES NEEDED.

With increasing classes, greater facilities must be given the instructors in foundry, forge, machine and wood shops, that they may adequately handle their classes. This applies not only to the apparatus and supplies but also with regards to schedules of classes. There seems to be plenty of work for the shops in the making of lathes for the pattern shop as well as bench lathes for the machine shop. Besides the above there are gas engines being built in the shops and others still in the drafting room.

NEW COLLEGE CATALOGUE HAS MANY QUEER NAMES

Diversity of Enrollment Gives Insight into Institution from Different Points of View.

A casual glance at the new college catalogue shows no DEARTH of odd names for a PLACE so LITTLE as Durham. All CRAFTS are represented here from the SCHOOLCRAFT to the SMITHS, who number seven. Although Durham is a no license town and Newmarket is now dry, we have a BARR where one can get FULLER than at any CONNOR in Dover. For the total abstainers we recommend our LAKE, though a trifle "MUDDY" owing to the recent FLOOD that CAME with the FOGG. In spite of this, however, you must GRANT our morals CANN not be far from WRIGHT when we have PAR-SONS, a POPE, an ABBOTT, and a LORD enrolled here. You would WAITE a LONG while before you could find anyone who would even STEELE the children's NICHOLS, and, to save the inmates of this hamlet from KNOX, we have the only KIDDER under a BOND to keep the peace. FORDS PREVALENT.

There are two SWAINS for the one DAME, but the BATCHELOR is expected to WINN, although our GAY KNIGHT has not given up the CHASE. A SLEEPER is often found in the GROVES around the college as well as in the class rooms. Not even Durham is exempt from the FORD for there are two here that make the students DODGE when they come down the LANE; and our PLUMER, BAKER, MILLER and SAWYER are so conscientious that they always WORK up to the stroke of the BELL, as you may have HURD.

IN AGGIE DEPARTMENT.
In the agricultural department the PRICE of a PECK of RICE is MOORE than in the WESTON states; but that is because it grows WILDER here and one must HUNT for it. The CASTOR BEAN flourishes among the THISTLE and MOSS of the LOW HILLS, but a CROSS-country WALKER need not fear it in its natural state. The first SARGENT of the second regiment from POLAND holds the KEY to this CILLEY STORY and promises DYER consequences if it does not end here.

LAST NUMBER OF LECTURE COURSE GIVEN BY S. S. MCCLURE.

The last number of the lecture course was delivered by S. S. McClure in the gymnasium, April 17. The first part of the lecture consisted of a brief review of Mr. McClure's early life in the British Isles and his coming to America to attend college in the middle west. Returning to England after his junior year in college he only succeeded in returning to this country by disobeying his mother's commands and working his way across.

His first work in the literary line was the editorship of the college newspaper. Numerous other ventures followed, accompanied by many failures until at last he conceived the idea of publishing a magazine which should deal exclusively with subjects of national importance. The story of the Standard Oil Co., is one of these which, although requiring a great expenditure of money, resulted in increased profits to Mr. McClure.

NEW LOCATION FOR NATURE BOOKS IN LIBRARY NOW.

About fifty volumes of the more popular books on birds, wild flowers, trees, and flower gardens have been brought down to shelves near the desk for the convenience of readers interested. Among them these books are new: Mathews' Field book of wild birds and their music; Mathews' Field book of American trees and shrubs; Mrs. Francis King's The Well-Considered Garden; Clutes' Fern Allies of North America. Other books lately bought are: Chamberlain's Songs of all the Colleges, Clarke and Dawson, Baseball; Ross, South of Panama; Street, Abroad At Home; Hardy, Hand of Ethelberta; Klockmann, Cult of the Needle; Bacon, Rambles Round Old Boston; Usher, Pan-Americanism; Burton, How To See A Play.

Mendel's law forms the basis of an interesting experiment at the green house with two varieties of squashes, the Warren and the Delicious. These varieties have been crossed and the second generation is now growing luxuriantly in the house devoted to their culture,

INFORMAL INFORMAL GETS GOOD TRY OUT

Notable Increase in Attendance—Singing Might Be Improved—Cards for Non-Dancers Suggested.

Friday evening, April 16, the gymnasium was the scene of an informal Informal. The consensus of opinion is that the dance was as great a success as could be expected for the first attempt in attaining the truly informal Informal. The number in attendance was notably larger than at other Informals. The faculty responded to their invitations with enthusiasm, and helped greatly in making the affair a success. Although the singing at intermission was enjoyable, the singing during and between the dances was not all that it should be. It has been suggested that card tables be placed along the side of the hall, for the pleasure of those who do not care to dance. This scheme will undoubtedly find favor with many, and should at least be tried out.

COLLEGE WHISTLE NEARLY FORGETS TO AWAKEN US.

The Order of Dogs has broken loose again and no one knows where its wrath may strike next. A short time before our Spring recess began, an unsuccessful but dastardly raid was made upon the pride and joy of our college, our whistle. Some sheep in wolves' clothing, with a mind so narrow that he could not see the jump in progress Durham made when a healthy steam whistle was added to the list of public nuisances, and with a soul so small that he could feel no thrill of emotion when he heard the discordant, rasping, ear-splitting shrieks that gladden our hearts four times daily attacked the whistle in a most cowardly manner. In the dead of night the miscreant climbed upon the roof of the college power house and by the process of cutting, removed a longitudinal section of about six feet from the rope that sets the plaything in action. Then, to add insult to injury, he left a note upon the pipe threatening a visit from the Order of Dogs, if the whistle continued to blow. Happily, the vile deed was discovered before seven o'clock the next morning so that we missed none of the pleasing toots from the whistle. A dire punishment awaits the malefactor, or malefactors, if they should become known.

SEVERAL N. H. STUDENTS TAKE PART IN DOVER PLAY.

At Dover last Friday the "Masquerading Widow" was presented under the auspices of the Episcopal church. John H. Rollins, '17, took the title role, A. L. Murdoch, '15, L. F. Brown '15, and D. W. Libby, '18, also took parts. The New Hampshire College orchestra played. The attendance was large and the parts were played in a most pleasing and satisfactory manner.

ANNUAL INITIATION OF NEW MEMBERS TO CASQUE AND CASKET.

The annual initiation of new members to Casque and Casket, with the exception of H. A. Scruton, who is to be initiated later, was held Thursday, April 29 in order that the two-year men enter before their term closed for the college year. The initiation was carried out with the customary hilarity, after which a banquet was served at the Beta Phi house. A regular meeting followed the banquet. The new members are: Gamma Theta: N. E. Robinson, H. A. Scruton. Beta Phi: F. W. Fitch, E. F. Cutts. Kappa Sigma: J. E. Frisbee, R. C. Wiggin. Theta Chi: W. H. Hoyt, R. T. Roberts. Zeta Epsilon Zeta: P. J. Griffin, N. J. Harriman. Alpha Tau Alpha: P. A. Tootill, R. E. Smith.

OUR SPRING POET BREAKS LOOSE AGAIN AND ATTACKS WEATHER.

Gol ding it fellers, ain't we queer critters though? First we kick because we don't get any rain and then when we get a few buckets full, we rear up and howl for a pleasant day. Why don't we do the way the folks do in Spain? When it rains there, they just let 'er rain and go puddling around in their bare feet with an umbrella over their heads, or, if they don't have any umbrella, they leave it at home and go out and get their hair wet same's a dog does in the country. All sun and no rain gits rather too sunny; All rain and no sun ain't worth the money; But some rain and some sun mixed in together Makes for us folks, the best kind of weather. Whatever the mixture though, don't raise a kick, But crack out a smile for the weather you git; We can't change the weather, an' its blame lucky too, For the kind I like best wouldn't ever suit you.

The Ladies' Aid gave a May breakfast last Saturday morning from 6.30 to 8 o'clock. A large number of people were in attendance.

Last Tuesday, Professor R. V. Mitchell gave an illustrated lecture on "Poultry Conditions in New Hampshire" at a meeting of the Ashland poultrymen.

On April 22, Professor Fred Rasmussen gave an illustrated lecture on "Denmark, the Land of the Storks," in the Unitarian church, Concord.

Professor Foster spoke before the Alton Grange last Tuesday on "Arbor Day."

On Thursday, May 27, at 4 P. M., examinations will be held for all students who have been conditioned, or who have received deferred marks in modern language subjects.

MEETING OF FEDERATION OF AGRICULTURAL STUDENTS

Five New England State Colleges Represented at Annual Meeting—W. J. Nelson Elected President of Federation.

The annual meeting of the New England Federation of Agricultural Students was held April 16 and 17 at Massachusetts Agricultural College at Amherst, Mass. Five of the six New England Colleges had delegates present Maine alone not being represented. At 9 o'clock Friday evening the meeting was called to order and before the session adjourned at midnight, the rules governing the crops judging, fruit judging, and fruit packing contests were gone over, a plan for rotation of officers adopted, and other general matters discussed. The meeting was continued Saturday morning from 9 until 10.30 o'clock. The principal business was the altering of the stock judging rules. The heads of Animal Husbandry Departments from Massachusetts, Maine, Rhode Island and Connecticut were present and offered many valuable suggestions. After election of officers, the meeting adjourned. The following officers were elected: President, W. J. Nelson, who was New Hampshire's delegate to the meeting; Vice President, John Hill of Connecticut State Agricultural College; Secretary - treasurer, Charles Moses of Massachusetts Agricultural College.

The next annual meeting will be held here at New Hampshire sometime in April of next year.

PATTERNS FOR WOOD TURNING LATHE UNDER CONSTRUCTION.

The manufacturing spirit appears to have broken out in the wood shop before it did in the machine shop. Mr. Philbrick reports that special students in wood shop have already designed and are now constructing patterns for a wood-turning lathe. This lathe is not copied from any now in the shop but has been designed especially for the needs there. A complete set of standard patterns will be made and kept on hand so that new machines can be readily made whenever they are needed. This work will afford the students thoroughly practical training in pattern making which is what Mr. Philbrick desires. Perhaps it is not generally known that the drawing tables in the Mechanical Engineering Department were made in vacation by students taking the Mechanic arts course for teachers. That they are well made is attested by the fact that they have withstood the steam heat of the winter months. Although the material from which they were made was bought for a different type desk, thereby causing considerable waste they were made for a smaller sum than manufacturers would have made them.

Which will you buy

a "cream thief" or a "savings bank" Cream separator.

WITH A GREAT MANY machines or implements used on the farm it doesn't make much difference which of several makes you buy.

ONE MAY GIVE YOU A little better or longer service than another, but it's mostly a matter of individual preference and often it makes little difference which one you choose.

NOT SO WITH BUYING a cream separator, however.

THE MOST WASTEFUL machine on the farm is a cheap, inferior or half-worn cream separator.

THE MOST PROFITABLE machine on the farm is a De Laval Cream Separator.

A CREAM SEPARATOR is used twice a day, 730 times a year, and if it wastes a little cream every time you use it it's a "cream thief," and an expensive machine even if you got it as a gift.

BUT IF IT SKIMS CLEAN TO the one or two hundredths of one per cent, as thousands and thousands of tests with a Babcock Tester show the De Laval does, then it's a cream saver, and the most profitable machine or implement on the farm—a real "savings bank" for its fortunate owner.

A De Laval catalogue to be had for the asking tells more fully why the De Laval is a "savings bank" cream separator, or the local De Laval agent will be glad to explain the many points of De Laval superiority. If you don't know the nearest local agent, simply write the nearest De Laval main office as below.

Spring and Summer Clothing

The most important factor in the matter of dress is the FEELING that your clothes are up to date, that they are properly tailored. Style is also a most important element in a spring suit—the Spring Suit is more closely observed than that of any other season.

Adler-Rochester

Suits always look well—they always hold their shape. They combine style, beautiful tailoring, perfect fitting and long wear—that's why they excell. And they are distinct and individual. Today is the day to make your selection—the assortment is now complete.

ROBIN BEACH '13 TEACHING ENGINEERING IN TEXAS

Has Charge of Electrical Measurements—Stanley Hargraves, 2 Yr. '06, with Vermont Experiment Station.

Robin Beach, '13, is assistant in Electrical Engineering at the Agricultural and Mechanical College of Texas, College Station, Texas. He has all the work in electrical measurements and is in charge of freshman class work. Laboratory facilities are of the best as every type of instrument is well represented.

The enrollment in the Agricultural and Mechanical College of Texas is 100 students. The college is under strict military discipline at all times.

During the last Christmas vacation "Bub" took a trip to New Orleans and Florida. At Tampa he visited with "Pa" Gale, '13, and "Jack" Croghan '08. Mr. Jones, an instructor in Animal Husbandry at New Hampshire last year, is also at College Station.

Last year, Mr. Beach taught at the University of Illinois. He plans to take up more graduate work in the East in the near future.

F. S. Putney, '05, is Assistant Professor of Dairy Husbandry at The Pennsylvania State College instead of Professor of Animal Husbandry as recently stated by The New Hampshire. This institution has within the Dairy Husbandry Department a herd of 120 head of dairy cattle. They have a new barn, constructed at a cost of \$1000, which is the best barn for dairy cattle connected with any Agricultural Institution in America. Pennsylvania State College is the only institution in which the barn and cattle form an integral part of the department. Here, as at Cornell, a great popularity for feeding work exists.

Stanley Hargraves, 2 yr., '06, is now connected with the Horticultural Department of the Vermont Experimental Station as gardener. Mr. Hargraves was first in Springfield, Mass., as foreman of the Park Department there. Later he took a trip lasting six months to England and then a prospecting trip through Oklahoma and Texas. He has been in Vermont since 1909. He is very enthusiastic over the advantages which the agricultural two year course at New Hampshire offers.

H. T. Converse, '10, has resigned his position as farm foreman in Melrose, Mass., to accept a temporary position as scientific assistant in Dairying in the U. S. Civil Service. At present he is engaged in field extension work in South Carolina working up cream routes.

The New Hampshire men in Pittsburgh recently had the pleasure of seeing Professor C. L. Parsons receive the honorary degree of Doctor of Chemistry, which was conferred upon him by the University of Pittsburgh at the dedicatory exercises of the new Mellon Institute building. Professor Parsons was formerly the head of the Chemistry Department of New Hampshire College and is now chief chemist of the Bureau of Mines.

C. E. Bell, 2 yr. '12, is at home with his father, who has the best pure bred herd of Ayrshires in the state.

H. D. Elkins, 2 yr. '12, has been employed as Dairyman and Assistant Buttermaker by Mr. R. W. Swain on the Honorable Warren Brown Farm in Hampton Falls until recently when he accepted a position as official tester of a Cow Test Association in the vicinity of Keene.

W. W. Evans, '08, is now working in the Research Department of the B. F. Goodrich Company, by whom he was formerly employed. He is carrying on some very important work and is meeting with excellent success.

President Fairchild recently paid a visit to Mr. and Mrs. H. C. Holden in Pittsburgh, Pa.

F. C. Ober, 2 yr. '12, is manager of D. Whiting & Sons, Certified Milk Plant in Wilton. He was previously employed by the same concern as tester, veterinarian, and record keeper.

Concluded from Page 2.

average country minister has done anything but fill him with religious fervor. So that every time he goes to church he may have definite feeling of unpleasantness. All of these impressions are stored away in what we term the sub-conscious mind, and in time when these impressions are sufficient in number they become definite conscious thoughts.

I think you will admit that on entering college the average student is not particularly interested in religious matters. The Freshman, on entering, attends perhaps one or two Y. M. C. A. Sunday meetings, as we have conducted them in the past.

He sits through from five to ten minutes of prayer conducted by the members. It reminds him of the good old days in bleak December, when Deacon B—used to go to Thursday night prayer meetings leaving his poor old horse to shake outside in the meeting house shed, the old blanket half under the horse's hind feet, while its knees knocked together to the accompaniment of the north wind. In the mean time the old deacon enters the church and tries to arrange for an agreeable climate to be supplied at some future date, while the horse uses up 67.5% of its digestible nutrients shivering in the evening breeze.

But let us return to our freshman, he finds a distinct churchiness in the Y. M. C. A. service; he finds that the prayers he hears do not seem to come from the hearts of the speakers, but are really given because it seems to be the custom to give them. These prayers are purely formal in character, the principle things being mentioned being the "thanks for the beautiful day" and a hope that the speaker may do a creditable job. The result of all this is that the freshmen does not attend again and the Y. M. C. A. fails to interest him.

Do not mistake me for I am a sincere believer in prayer but only at the right time and the right place, and that time and place is certainly not at a public mass meeting of students whose ages range from 19 to 23 years. Perhaps some of our greatest prayers may never be heard by a human ear. Prayer in action is the prayer of today!

Don't you see Mr. Wadsworth that the Y. M. C. A. was designed to do forms of work which the church could not well undertake and that when the Y. M. C. A. tries to ape the work of the church, it not only weakens the power of the church but itself as well, and the result is generally inefficiency?

Don't you see that the watch word of the Y. M. C. A. is "service," and that it does not mean service wholly in one direction? The Y. M. C. A. theory is based on the triangle Spirit, Mind and Body, and if this be true why put all this emphasis on the Spirit? Why not put more stress on the other two sides of the triangle Mind and Body, and the third side will come as a natural and inevitable result. Did you ever know a man with a clean mind and a clean body who did not possess a clean spirit?

In Y. M. C. A. work occupational talks by leaders in business, science, government and education, and addresses along sociological lines on the vital problems of today will accomplish more to make this world a better place to live in, than singing "I Want To Be An Angel," from now till the Satanic regions are frozen over.

You can't cram religion down a man's throat because he won't swallow, and if you wish to interest men in the Spirit side of the triangle you must lead up to it gradually through the other two sides.

If you would sell a man a large order of goods, which would you do? Go to him and say "You need these goods and you must buy them" or would you find out facts concerning the man, get well acquainted with the man, and

finally after he became interested, show him how he would never become satisfied to get along without the particular thing which you were selling? Which kind of tactics do you imagine would land the order?

Dr. Frank Crane says "The moral force of yesterday sought to save men from hell hereafter, the ethical enthusiasm of today is directed towards saving men from hellishness here. We are more profoundly religious now than were men of any previous era. But we are not saving brands from burning; we are putting out the fire."

Now Mr. Wadsworth, in my little talk I was simply discussing conditions as I have studied them here in the Y. M. C. A. at New Hampshire College, and as we have neither lepers, nor the lame, halt, and the blind here at college, I think the arguments in their behalf do not apply to the question at hand. If I am correctly informed General Booth was engaged in Salvation army work, Moody in evangelistic work, and Billy Sunday is chasing the "Almighty Dollar," and as none were or are Y. M. C. A. workers, I fail to see how their methods are of interest to us in this discussion.

Very truly yours,
Walter Edwin Chamberlain, 1916.

Hogs Gain Faster

Prove It By Making This Test

Put a bunch of hogs or shoats in a separate pen or enclosure—feed them SAL-VET 60 days as directed, and you will get the best proof of its merits as a conditioner and worm destroyer. Wormy stock cannot thrive on the choicest of rations—balanced or unbalanced. Worms annoy—keep animals ravenous—run-down—ill-natured—discontented—unthrifty—liable to any disease.

Hon. A. J. Lovejoy, Roscoe, Ill., writes: "Please send us two barrels of SAL-VET at once. This is the best thing we have ever used. We use it for sheep, horses, and over 100 head of hogs and find it all you claim."

J. E. Snell, Flora, Ind., says: "SAL-VET is a wonder. I had 14 shoats that would not fatten. I fed them SAL-VET and I was very much surprised to see come from them rolls of worms from 12 to 14 in. long. These shoats mended at once, and are now doing finely."

Send No Money—Just the Coupon

Tell me how many head of stock you want to feed—I'll ship enough SAL-VET to last them 60 days. Simply pay the freight on arrival—feed the SAL-VET as directed—at the end of 60 days report results. If SAL-VET has not done all I claim—I'll cancel the charge—you won't owe me a cent.

1000 lbs., 21.12

No orders filled for less than 40 lbs. on this 60-day trial offer. Never sold in bulk; only in Trade-Marked SAL-VET packages. Shipments for 60 days' trial are based on 1 lb. of Sal-Vet for each sheep or hog, and 4 lbs. for each horse or head of cattle, as near as we can come without breaking regular sized packages.

—is not a food, but a medicated salt, fed with the ration, or separately according to directions. I guarantee it to rid stock of stomach and free intestinal worms, to aid digestion and to condition the animals so fed. All stock look better, do better, act better. Every animal having free access to SAL-VET is a standing advertisement of its value. I'll prove its value to you at my own risk.

CONCERT GIVEN UNDER AUSPICES GIRLS COUNCIL

J. Franklin Babb, Well Known Reader—Harry Doe, Violinist—Miss Julia Roberts Voice—Make Pleasant Evening.

Last Tuesday evening at the gymnasium an exceptionally fine concert was given under the auspices of the Girls' Council, for the benefit of the College Song Book.

Mr. Harry Doe, a former resident of Durham, rendered his violin selections in a very artistic manner, with Miss Nellie White '16, as his accompanist. J. Franklin Babb, the well known lecturer, of statewide recognition, kept the audience in gales of laughter with his humorous readings. Miss Julia Roberts '17, sang with her usual charm, and responded to enthusiastic applause.

The program was as follows:

Souvenir de Haydn	Leonard.
Theme	
Variation	Mr. Doe.
Rastus and the Turkey,	Babb.
Mr. Babb.	
Vocal Selection.	
Miss Roberts.	
Humoreske	Dvorak
Gavotte	Gossec
Mr. Doe.	
Batiste	Mr. Babb.
Vocal Selection	
Miss Roberts.	
The Football Game.	Mr. Babb.
Chanson	Allen
Mr. Doe.	

The ushers were young ladies and candy was sold during the evening.

WOMAN'S LEAGUE HOLDS REGULAR MEETING AT SMITH HALL

On Wednesday afternoon, April 14, the Woman's League met at Smith Hall. Officers for the coming year were nominated, the election to take place at the next regular meeting of the League. After the business meeting a social hour was in order, during which sandwiches and tea were served. Mrs. Pettee and Mrs. Smith were the hostesses of the afternoon.

Exploits of Elaine every Monday and Tuesday at Lyric.

TEXT OF TALK BY GOVERNOR

Concluded from page 1.

as generously as they have with their State College.

GROWING INTEREST.

Their action and their general attitude towards the college seem to me to indicate a very gratifying appreciation and approval on their part, and on the part of their constituents, of the work which is being done at Durham. This appreciation is further shown by the rapid increase in the enrollment of the college; by the large amount of space which the press gives to doings at Durham; and by the spirit manifest at such gatherings as this one here tonight.

And now for a final, brief word of what would be inspiration for you and for all friends of the college, I am sure, if I had the eloquence with which to express fully my feelings in regard to the future of the institution at Durham.

It is certain that New Hampshire College is to do a greater and greater work as the years pass on, in the education of youth.

I hope that the state of New Hampshire will benefit to an even larger degree than in the past from that work.

We cannot blame the boys and girls, as they complete their courses and obtain their degrees, from going out into the world and selling their services in the best market; which, too often, seems to them to be beyond the borders of their own state.

OPPORTUNITIES IN N. H.

What we can do, perhaps, is to show them that there are opportunities, good opportunities, in New Hampshire, for the use of all they have learned and all that they are.

New Hampshire does not say, as she might, that the graduates of her college owe her a debt of gratitude for their education. What she does say is, that she needs them in all her lines of activity and that she can give them all profitable and honorable employment.

There is nothing which would give me, personally, more pleasure, than to be able to inspire, in some degree, every graduate and every undergraduate of the New Hampshire State College with an earnest desire to serve the best interests of the state of New Hampshire in her agriculture, her business, her politics, her schools and her homes.

LECTURE BY J. H. PHILBRICK ON HENRY-DISTON CO.

The class in manual training was given a most interesting illustrated lecture by Instructor J. H. Philbrick last week. The slides were furnished by the Henry Diston Company of Philadelphia and illustrated their plant, which employs 3500 men and is one of the oldest and largest tool manufacturing establishments in the United States. Several processes were shown, so that one might see all the steps included in the making of hand saws, various types of band saws, and files. Everything used in the plant is manufactured there, even to the steel. There is a wall surrounding the grounds seven feet high, extending two feet below the surface of the ground, and two feet thick, composed entirely of grindstones which have been worn out and discarded. All sorts of tools used in manual training are made, and many other facts of interest were brought out.

NEW HAMPSHIRE BOARD GETS FOBS AS RECOGNITION.

Thinking that some form of recognition should be provided for service upon the New Hampshire board, it was decided to furnish each member of the staff with a watch fob. These fobs have now arrived and may be seen accompanying their owners about the college campus. The design is done in bronze, and is rectangular in shape. One side has the college seal upon it, with the words "The New Hampshire" below the seal, while the reverse side has engraved upon it the initials of the recipient and the position held upon the board and the year of service.

LIEUT. S. J. SUTHERLAND FORMS GIRLS TENNIS CLUB

A Girls' Tennis Club has been organized by Lieut. Sutherland. Miss Josephine Brackett was elected president of the association and Miss Mildred Flanders secretary and treasurer. The tennis court behind Smith Hall is to be completed and used for the sport. A set of rules has been drawn up and adopted by the club. Membership is open to all women students on payment of the fee. Great interest in this organization is shown by the girls and it is expected to be a great success.

EFFICIENCY SURVEY OF FARMS IN THE STATE

M. C. Wilson of U. S. Department of Agriculture Making Real Survey of Our Rural Homes.

If you can't make money on your New Hampshire farm, ask Mr. M. C. Wilson. He's the trouble finder. If it's in the cows, in the silage, in the woodlot, or in the orchard, he'll spot it, and tell you how to plug the leak. Mr. Wilson is the farm efficiency man, and he is the greatest discoverer of what's the matter, that ever wandered into these parts.

He has just come from Orleans county, Vermont, where he has completed a farm efficiency survey. Now he is engaged in the same work in Cheshire and Sullivan counties in this state, and he is assisted by the county agricultural agents there, and by other extension service workers of the New Hampshire college experiment station.

REAL SURVEY.

They determine whether a farm is efficient or not by a farm survey. They survey all the farms of the neighborhood and then they take up another neighborhood. They examine blocks of lowland farms and blocks of farms back in the hills. They get those near the railroad and those far away. And when they survey a farm, it is surveyed. Its innermost secrets are bared. They ask the farmer a list of questions that would make a census enumerator blush, and the farmer, when the system is explained to him, is glad to answer. Only two men in this state so far have declined.

No one but the surveyor knows the facts. The farmer's confession is held absolutely confidential, but all the statistics for each group are totalled and averaged, and the averages any one can have.

WHAT AVERAGES SHOW.

These averages show what the typical farm is in size. They show how many cows it can support, what they ought to produce. They show how much hay should come from an acre, how much silage should be cut, and they show how much capital should be invested if the greatest returns are to be expected, and they show a hundred and one other things. They show, in fact, all there is to know about farms in that particular neighborhood.

Armed with this data, the surveyor goes now a second time to any farmer needing help. He takes this man's statistics a second time and writes them down now alongside the average figures. By this comparison the farmer, for example, finds he is ahead of the game on hay production, but that his land should have given him more silage. He finds that he does not get so much money from his cows as he should. He gets, he discovers, as much milk as the others, but finds for the first time that he is paying too much for it. In fact, if there is a weak spot anywhere in his farm, this system will disclose just what it is. Then the expert is on hand to prescribe. He knows how to cure and his advice is free.

U. S. DEPARTMENT MAN.

Mr. Wilson is an agent of the United States department of agriculture. When he has finished Cheshire and Sullivan counties, he or his successors will make the efficiency surveys in Belknap, Coos, and Merrimack counties. His assistants are local, furnished by the state through the college.

PROFESSOR D. LUMSDEN RECEIVES APPOINTMENT

Professor D. Lumsden formerly instructor in the Department of Horticulture at the New Hampshire College, and now Assistant Professor of Floriculture at Cornell University has recently received the appointment as Superintendent of the Pomological and Floricultural exhibits of the New York State Fair Commission.

Professor Lumsden's appointment was indorsed by Professor E. A. White, Chief of the Department of Floriculture at Cornell University, Professor U. P. Hedrick, Experiment Station, Geneva, N. Y., and Commissioner of Agriculture, Hon. C. S. Wilson of Albany, N. Y., formerly chief of the Dept. of Pomology at Cornell University.

FINE BUILDING FOR EXHIBITS.

The spacious and beautiful building known as the Manufacturers' and Liberal Arts building at the New York State Fair near Syracuse, N. Y., will be used for the horticultural exhibits. Notable improvements are to be made in the building and an up-to-date refrigeration plant added. Exceptionally large premiums for horticultural exhibits are offered at this fair.

Everywhere Uniformly Satisfactory

In upper New York, in lower California, and in far away New Zealand

is acknowledged by those who use it as the one cleaner most suitable for dairy cleaning.

In lower California the temperature often reaches 120° to 130° F., in summer, and under these conditions you can easily appreciate the importance of unfailing sanitary cleanliness. Occasionally a buttermaker or a milk producer working under the most unfavorable circumstances, writes us and tells us that Wyandotte Dairyman's Cleaner and Cleanser has been a helpful factor to him in winning first prize in some dairy exhibit.

If you want this kind of dairy cleanliness that is uniformly satisfactory even where the conditions are most unfavorable, then ask your dealer for Wyandotte Dairyman's Cleaner and Cleanser or write your supply man. Sold in 5 lb. sacks, barrels, and kegs.
